EDUCATION

- **Bachelor of Technology in Computer Science and Engineering (AI and ML)** 2023 - Present
Vellore Institute of Technology, Bhopal CGPA: 8.19

TECHNICAL SKILLS

Programming: C, C++, Python, JavaScript/TypeScript, SQL, HTML/CSS
Generative AI & LLMs: Prompt Engineering, RAG, Agentic AI, Function Calling, Vector Databases, Embeddings, LangChain, OpenAI & Gemini APIs, BERT Fine-Tuning, AI-Assisted Development
Web & APIs: React.js, Node.js, Flask, REST APIs, Microservices, Postman
ML & Data: TensorFlow, scikit-learn, Pandas, NumPy, OpenCV, NLP, MLOps fundamentals
Tools & Platforms: Git/GitHub, VS Code, GitHub Copilot, Microsoft Copilot, CI/CD, PyTest, debugging & log analysis, Agile, Azure, MySQL, MongoDB
Coursework: Data Structures & Algorithms, Object-Oriented Design, Operating Systems, DBMS, SDLC

PROJECTS

- **Agent-Based Multi-Tenant RAG Platform**
Production-scale conversational AI platform integrating semantic retrieval and function calling.
 - Designed a scalable microservices architecture leveraging Python; implemented hybrid search methodologies using vector databases and dense embeddings to boost semantic retrieval alignment by 45%.
 - Deployed an autonomous intent router via OpenAI APIs and LangChain to orchestrate event-driven workflows, executing advanced prompt engineering and caching strategies to ensure low-latency inference in production.
 - **Tech Stack:** Python, LangChain, OpenAI API, Vector Databases, Embeddings, REST APIs, Microservices, Caching.
- **Bank KYC Remediation Platform**
Automated KYC document verification system processing 500+ documents using Agentic AI and Azure.
 - Developed an agentic AI document processing pipeline using LangChain and LangFlow that classifies 3 document types, extracts 15+ structured fields via Azure Form Recognizer, and validates against databases with 98% field-level accuracy.
 - **Tech Stack:** Python, Azure Form Recognizer, Azure Blob Storage, OpenAI GPT-4, LangChain, LangFlow, Flask, React, OCR, NLP, REST API.
- **MailFlow - AI-Powered Support Email Triage and Response System**
Automated classification, routing, and AI-generated responses for customer support email.
 - Built a Flask backend integrating Gemini 2.0 Flash and a fine-tuned BERT model to analyze email intent with 92% classification accuracy, auto-routing queries across 5 departments and reducing average response time by 70%.
 - **Tech Stack:** Python, Gemini 2.0 Flash, BERT, Flask, Gmail API, MySQL, JavaScript, HTML/CSS.

EXPERIENCE

- **SortMyPrep (ZKAP EdTech Services)** May - July 2026
AI Engineer Intern Remote
 - Audited 10,000+ pages of educational corpora for a generative learning platform, comparing outputs against original sources to eliminate 95% of symbol transcription anomalies and mathematical syntax errors.
 - Constructed robust data processing pipelines in Python to convert raw unstructured data into 500+ standardized training files, adhering to MLOps practices to support downstream LLM fine-tuning and retrieval optimization.
- **Coforge BPS, Pune** May - July 2025
AI Intern Offline
 - Architected and deployed an end-to-end KYC verification pipeline on Microsoft Azure, leveraging Form Recognizer, Blob Storage, and OpenAI to automate identity validation for 500+ documents with 98% extraction accuracy.
 - Designed and implemented agentic AI workflows using LangChain and LangFlow, reducing manual document processing time by 60% and cutting verification turnaround from 48 hours to under 8 hours.
 - Delivered a production-ready React front-end integrated with Flask REST APIs and Azure Communication Services, enabling real-time document upload, status tracking, and automated notifications.
 - Optimized model inference latency by 30% through batched API calls, caching strategies, and efficient Azure resource management across 3+ cloud services.

ACHIEVEMENTS

- **IEEE Hackathon Winner** — 1st place with SafeStep, an AI-powered assistive technology project, competing against 50+ teams.
- **SolvIT Hackathon Winner** — recognized for building an innovative technology solution under competitive hackathon conditions.
